## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-28, drawn to a bag, classified in class 224, subclass 610.
  - II. Claims 29 and 30, drawn to a method of a method of packing a bag, classified in class 53, subclass 469.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by another and materially different method. For example, the bag of claims 1-28 could be made by inserting the pillow with the arms uncompressed as opposed to claims 29 and 30 which require the step of squeezing the arms toward each other, i.e. the bag of claims 1-28 can be loaded without compressing the pillow.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
